BONUS for Advanced Novice Single Skating

Skaters can earn bonus points for jumps that are achieved in Short Program and/or Free Skating. To be eligible for bonus points, jumps must be fully rotated or landed on the quarter (q) and must be in accordance with the Short Program requirements as well as the well-balanced Free Skating program and the repetition rules for jumps. Jumps can be performed as a solo jump, or in jump combination or jump sequence. Jumps that are identified by the Technical Panel as under-rotated (<), downgraded (<<), with wrong edge (e) or have a fall or being identified as invalid element (*) are not eligible to receive bonus points. However, if in a jump combination or sequence there is a fall on a jump other than the bonus-generating jump, the bonus is still received. For example, 3Sb+2T with a fall on the 2T. If an element has attention (!) and quarter (q), it is still valid for bonus points. Jump(s) with +REP can receive a bonus.

- Short Program: In the Short Program a maximum of two (2) bonus points can be achieved: one (1) bonus point for one (1) Double Axel and one (1) bonus point for one (1) triple jump.
- Free Skating: In the Free Skating Program, a maximum of three (3) bonus points can be achieved: one (1) bonus point

for one (1) Double Axel and one (1) bonus point each for any two (2) different triple jumps. In case of jump combinations or jump sequences, all jumps eligible for a bonus point in accordance with the above regulations and limitations can receive bonus points. For example, 3Sb+2Ab+seq.

The Technical Panel will decide upon the bonus points and add them respecting the above regulations and limitations to the respective jump element(s). The Technical Controller will advise the Data Operator to add the bonus point at the end of the jump by using the respective “Bonus” button on the Data Operator’s screen (i.e. 2Ab, 3Lzqb+3Tb) during the review process. The bonus will be assigned to the first two jumps in Short Program and to the first three jumps in Free Skating that fulfill the requirements in order of their execution. In accordance with ISU Rule 353 (ISU Judging System - determination and publication of results) paragraph 1. (Basic Principles of Calculation) and respective subparagraph f), the panel's score for each Section/Element is determined by adding the trimmed mean GOE of this Section/Element to its Base Value. The bonus points are added in addition and will determine the panel’s score for jump elements where the Technical Panel identifies such bonus points (Base Value + GOE + Bonus Point(s) = Score of Panel).

Levels explanations:

For Advanced Novice Single Skating, in all elements that are subject to Levels, only features up to Level 3 will be counted. Any additional features will not count for Level requirements and will be ignored by the Technical Panel.
